Let's get 1466 moving again!

Restoring 1466 to full working order In April 1964 this little 14xx 0-4-2T became the first engine to be taken into preservation by the Great Western Society. Wouldn't it be wonderful if 1466 could be overhauled in time to celebrate in 2021 the 60th anniversary of the society?

1466 has been in the queue for its third major overhaul in preservation since 2000. At that time it was taken out of service due to the condition of its foundation ring. Mechanically the engine is in very reasonable condition, but it is known that a new backplate, firebox side plating and possibly a new boiler barrel will be needed. Until the locomotive is dismantled it cannot be certain exactly how much the final cost will be, but one estimate is around £150,000. Much of the work may have to be contracted out. Although there is already some money in the 1466 restricted fund, we are now inviting donations of any size to build up the fund to carry out the overhaul. Bankers Orders, even for a limited period, would be particularly welcome to bolster the fund as well as providing a regular income to help with budgets.

What ever help you can give will be gratefull received and allow this flag ship locomotive to steam again. If you can help please complete the form overleaf and return as directed.

Thank you.
